

FOR IMMEDIATE RELEASE

XO Communication Enterprise Sales leverages ASC Contracts™ solution

Ottawa, Ontario--October 19th, 2007—Advanced Software Concepts (ASC) announced today that XO Communications, a leading provider of 21st century communications for businesses and communications service providers, is leveraging ASC's Contract Lifecycle Management solution for its new Enterprise Solutions Group (ESG). Looking to expedite the launch of this new organization and take advantage of the productivity benefits already recognized by an earlier deployment by the XO Carrier Services organization, the XO ESG identified requirements and had ASC deploy their required customizations in under 2 months.

ASC's solution provides XO with an easy to use, secure and enterprise customer specific application to create, manage and store contracts, automate the contract approval and negotiation process, provide a central repository and complete audit trail of XO sales contracts and related activity. In addition to managing the contract creation process, the ASC solution optimizes operational, transactional and regulatory compliance for XO Communications by ensuring that appropriate controls and measures are in place during the entire sales contract lifecycle.

"Advanced Software Concepts delivers an effective contract lifecycle management solution specifically tailored to streamline the execution of contracts with our enterprise customers," said Tim Shaheen, vice president of enterprise sales. "By helping us expedite the contract process, ASC will help us move faster with new revenue opportunities."

"Delivering on our promise to leverage XO's existing investment in ASC Contracts™ throughout XO's organization was paramount. ASC's Telecom Contract Management solution tailored specifically for XO provides a strategic Sales advantage", explains Shawn King, ASC President and CEO, "by minimizing operational risks and expediting the contract management process. We are looking forward to continued growth at XO Communications".

Founded within a framework of industry best practices, ASC's Contract Management offering is a web-based solution that is easily tailored to specific environments and processes. ASC's solutions provide a central database to track key steps within a company's contract administration process. Whether your focus is on Sales, Procurement, Finance or Legal, the platform's advanced query and reporting tools permit authorized users from various departments to quickly analyze the relevant contractual data.

Using secure web access, sales and procurement personnel can generate bar-coded contracts or approval forms online and email or fax contracts to customers and/or suppliers. ASC Contracts unique bar code recognition ensures signed images are accessible in real-time and the flexible and comprehensive workflow engine allows for automatic notification and routing of agreements for signature and management approval.

Advanced Software Concepts is committed to providing innovative, market-specific solutions. By using the ASC Contract Management Solution, companies like XO Communications have an easily accessible, centralized repository that houses all contract and related information required to ensure consistent, repeatable sales contract administration and compliance.

About XO Communications

XO Communications, a subsidiary of XO Holdings, Inc. (OTCBB: XOHO.OB), is a leading provider of 21st century communications services for businesses and communications services providers, including 50 percent of the Fortune 500 and leading cable companies, carriers, content providers, and mobile operators.
